

## User Manual

By Pritam Mallick

---

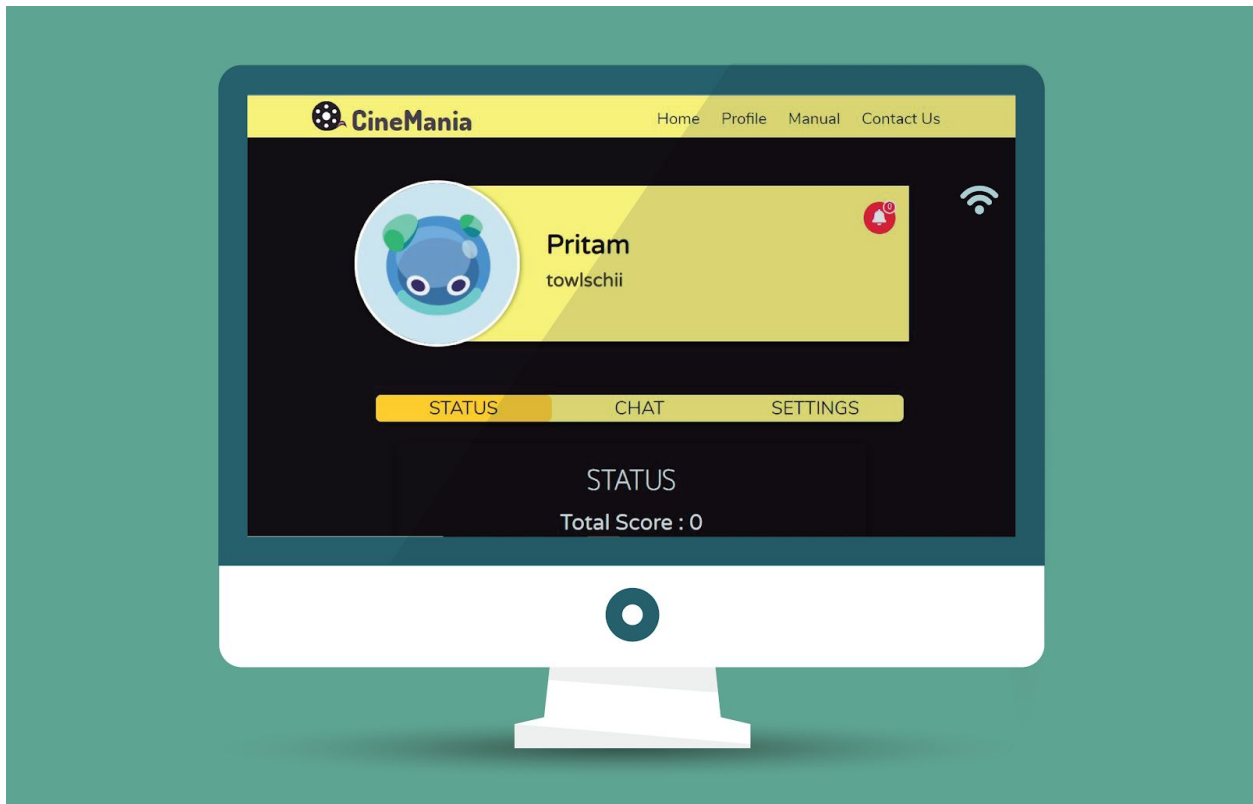

### Overview

CineMania is an online based game which allows multiple users to challenge each other in a duel match through a client server mechanism. Players are required to enter the name of a movie for the opponent as a question and answer the opponent's question in return.

---

## Player Profile

### Players can set their avatars and access their performance!

Players can create their own interactive profile where they can observe their score, wins and losses. They can also unlock and update their avatar according to their score. A profile is compulsory to play a game.

[Check out on our website](#)

---

## Bot Match

### Players can play with a bot for practice!

Players are required to guess the correct name of a movie by hitting keyboard keys. Each response is grouped as a right or wrong guess. The answer might contain special characters like comma, space, hyphen, etc. The answer must be given within limited time and trails, however no points shall be awarded in this mode. After the end of a round, players can REFRESH the page for another round(try avoiding REFRESH during a mid game).

---

## Multiplayer Match

### Players can challenge each other anonymously!

Players can match with other online players and gain points throughout the matches. There are no negative points and every match grants the user points that will unlock new features. Player needs to enter the name of a movie in the text box, and select the FREEZE button to lock the response. After the opponent does the same SEND button is activated and by selecting it, the entered movie names are interchanged as challenge. Further way of solving is similar to that of BOT Match.
